THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: Mail **Mail Stop ISSUE FEE**
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
or Fax **(571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

DATE MAILED: 10/20/2010

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 666 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 666 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

Response to Amendment

1. This action is responsive to applicant's amendment and remarks received on 9/17/10.
Claims 1-3, 8-12, 17, 18, 21-25 are currently pending.

Allowable Subject Matter

2. Claims 1-3, 8-12, 17, 18, 21-25 (to be re-numbered as 1-15) are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding **claim 1**, the most relevant prior art of record, Mukoyama, Bothey with Takahashi combination, teaches storing object data in an object data storage section; disposing a plurality of objects in an object space, based on the object data stored in the object data storage section; controlling a virtual camera; generating an image viewed from the virtual camera in the object space while performing hidden surface removal processing; disposing in the object space, a model object including a plurality of part objects each of which has a projection shape, a three-dimensional projecting portion and a display surface on which an image is drawn, the projecting portion extending at least in a direction perpendicular to the display surface (see Non-Final Rejection on 5/20/10).

Applicant's claimed invention distinguishes over the Mukoyama, Bothcy with Takahashi combination by wherein a central part object included in the model object stands along a vertical central axis, and the rest of the part objects are positioned apart from central axis of the central part object, the central axis extending through a center of the central part object; and rotating each of the part objects orbitally about the central axis, with a processor, based on rotational information of the virtual camera so that the display surface of each of the part objects is directed toward the virtual camera when the virtual camera orbitally rotates about central axis while being directed toward the central part object.

Regarding **claims 3, 12, 22, 24**, the claims were indicated as allowable as seen within the Office Action dated on 5/20/10. The reasons for allowance are the same as mentioned within the cited Office Action.

Regarding **claim 10**, the most relevant prior art of record, Mukoyama, Bothcy with Takahashi combination, teaches storing object data in an object data storage section; disposing a plurality of objects in an object space, based on the object data stored in the object data storage section; controlling a virtual camera; generating an image viewed from the virtual camera in the object space while performing hidden surface removal processing; disposing in the object space, a model object including a plurality of part objects each of which has a projection shape, a three-dimensional projecting portion and a display surface on which an image is drawn, the projecting portion extending at least in a direction perpendicular to the display surface (see Non-Final Rejection on 5/20/10).

Applicant's claimed invention distinguishes over the Mukoyama, Bothcy with Takahashi combination by wherein a central part object included in the model object stands along a vertical

central axis, and the rest of the part objects are positioned apart from central axis of the central part object, the central axis extending through a center of the central object; and rotating each of the part objects orbitally about the central axis based on rotational information of the virtual camera so that the display surface of each of the part objects is directed toward the virtual camera when the virtual camera orbitally rotates about the central axis while being directed toward the central part object.

Regarding **claim 21**, the most relevant prior art of record, Mukoyama, Bothcy with Takahashi combination, teaches storing object data in an object data storage section; disposing a plurality of objects in an object space, based on the object data stored in the object data storage section; controlling a virtual camera; generating an image viewed from the virtual camera in the object space while performing hidden surface removal processing; disposing in the object space, a model object including a plurality of part objects each of which has a projection shape, a three-dimensional projecting portion and a display surface on which an image is drawn, the projecting portion extending at least in a direction perpendicular to the display surface (see Non-Final Rejection on 5/20/10).

Applicant's claimed invention distinguishes over the Mukoyama, Bothcy with Takahashi combination by wherein a central part object included in the model object stands along a vertical central axis, and the rest of the part objects are positioned apart from the central axis of the central part object, the central axis extending through a center of the central object; and rotating, with a processor, each of the part objects orbitally about an X-axis, which passes orthogonally through the central axis and extends in a direction orthogonal to a direction of sight line from the virtual camera, based on rotational information of the virtual camera so that the display surface

of each of the part objects is directed toward the virtual camera when the virtual camera orbitally rotates about the X-axis while being directed toward central part object.

Regarding **claim 23**, the most relevant prior art of record, Mukoyama, Bothcy with Takahashi combination, teaches storing object data in an object data storage section; disposing a plurality of objects in an object space, based on the object data stored in the object data storage section; controlling a virtual camera; generating an image viewed from the virtual camera in the object space while performing hidden surface removal processing; disposing in the object space, a model object including a plurality of part objects each of which has a projection shape, a three-dimensional projecting portion and a display surface on which an image is drawn, the projecting portion extending at least in a direction perpendicular to the display surface (see Non-Final Rejection on 5/20/10).

Applicant's claimed invention distinguishes over the Mukoyama, Bothcy with Takahashi combination by wherein a central part object included in the model object stands along a vertical central axis, and the rest of the part objects are positioned apart from central axis of the central part object the central axis extending through a center of the central object; and rotating each of the part objects orbitally about an X-axis, which is passes orthogonally through the central axis and extends in a direction orthogonal to a direction of sight line from the virtual camera, based on rotational information of the virtual camera so that the display surface of each of the part objects is directed toward the virtual camera when the virtual camera orbitally rotates about the X-axis while being directed toward the central part object.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
